- Every cost is included, from luggage handling, all entrance fees, meals & drinks.

Yokohama city, just half an hour from **Tokyo** is Japan's second-largest city where Commodore Perry first landed in 1853 with fleet of warships, demanding Japan end its 300-year policy of self-isolation and open up to foreign trade. Yokohama opened as a port in 1859 and quickly becoming Japan's center for foreign trade.

Towards the south is **Kamakura** which was Japan's capital for around 150 years. The **Kamakura shogunate** was the first feudal samurai government in Japan that existed from 1185 to 1333 by the **first Shōgun** Minamoto no Yoritomo after the conclusion of the Genpei War, which saw the struggle between the Taira and Minamoto clans.

Between Kamakura and **Mount Fuji** lies **Hakone** which is famous for **onsen (hot springs)** so stay in a traditional **onsen ryokan (traditional Japanese-Inn)** and enjoy a delicious meal..

Commodore Perry
